JOHN A. SALZER SEED CO.

La Crosse, Wis.

SALZER'S Early Bird Radish

We introduced this grand radish over 50 years ago and have been extensively developing and improving it, so get your seed from us if you want genuine, true-to-type seed. Don't take anything "just as good." **Salzer's Early Bird is of globe-shape, bright scarlet color, has very short tops, flesh is pure white, fine grained, crisp, nice, spicy taste, and never becomes hollow or pithy.** Averages $\frac{1}{2}$ to 1 inch in diameter, according to maturity. It is alike most valuable for outdoor planting in spring or in autumn, and usually commands top prices.

Salzer's Early Bird, the incomparable radish, has produced radishes ready for the table in 12 days' time under very favorable conditions, radishes that were uniform in size and shape, uniform in maturity, with small tops and of beautiful and attractive bright red color. For the average gardener, however, one may figure about 18 days maturity. It is also one of the best strains for growing under glass.

If you are at all anxious, either as a market gardener or as a grower of Radishes for your own private table, to have Radishes from 3 to 10 days ahead of your neighbor, and if you are anxious to have the finest Radish that seed can produce, even under the most adverse circumstances, then by all means plant Salzer's Early Bird. **Its crisp, brittle flavor, as well as its remarkably quick growth and fine color, alike recommend it. Not only is Salzer's Early Bird extremely early, but it also yields heavily and its quality is unsurpassed.** You will agree that it is the earliest, finest and best tasting radish that is grown to-day!

975—Pkg., 13c; oz., 22c; 2 oz., 39c; $\frac{1}{4}$ lb., 73c; $\frac{1}{2}$ lb., \$1.25; lb., \$2.35, postpaid.

Blood Red Snow White Tipped Radish

An Exceptionally Fine Radish

The lively scarlet color points off to a pure white tip, giving it a most attractive appearance. It's perfection itself when it comes to quality and earliness! Splendid for forcing, also fine to plant as a succession variety. Radishes run uniform in both shape and size, averaging about $\frac{3}{4}$ inch in diameter. The skin is thin and tops are very short. The sparkling, snow white flesh is crisp, tender, fine grained and sweet. Does not become pithy or hollow. Matures in about 23 days. Crop very short.

77 Years of Faithful
Service

Dear Friends:

It is time to think about gardens again and this year your Victory garden is going to be just as important as it was any time since Pearl Harbor. You, along with 20 million other Victory Gardeners produced enough vitally needed food last year to make it possible for our government to take certain canned vegetables off the rationed list. Unless we produce as much or more in 1945, we may be faced with a larger list of rationed foods. Then, too, all of us gardeners know that nothing can compare with fresh vegetables we pick from our gardens as we need them. None of the vitamins are lost, and we get the most food value whether for canning or table use. The best vegetables are fresh vegetables as they come only from your garden, picked as you need them.

While we are happy that Victory is in sight, we must not overlook the tremendous amount of food we will be called upon to supply for the liberated people of Europe.

We cannot urge you too strongly to order early. Like most everyone, we have a number of our experienced employees in the armed forces. We are glad they are able to serve their country so well, but the burden of filling your needs falls on us older folks on the home front. For this reason we ask again that you order as early as possible so we can give your orders our personal attention and prompt service.

And, of course, while we may be prejudiced, we just know that you get only the best seeds when you buy from Salzer. That's the way we have been selling for the past 77 years.

We thank you for your past orders and extend our best wishes for another successful Victory Garden in 1945. Until Peace Brings Plenty, Plant More for Early Victory.

Sincerely yours,

Kenneth E. Salzer

"We canned 38 Quarts and had all we wanted for table use, from One pound of Salzer's Cliffwood Early Wonder Wax Beans." Writes

MR. ERNEST CLARK,
DALE,
INDIANA

SALZER'S CLIFFWOOD EARLY WONDER WAX

The Sensation of Recent Years

Without question this is the most wonderful wax bean introduction of recent years, and the best for the market and the home garden. Belongs to the flat podded class and grows a strong plant eighteen inches high and two feet across. Plants are heavily loaded with pods five to seven inches long, flat, plump, meaty, and of a clear, handsome, waxy yellow color. Very tender, brittle, of fine texture and quality, and is the very earliest wax-podded bean. They are remarkable for their brittleness, exceptional flavor, and their absolute freedom from strings. Matures in 45 days.

EDIBLE SOY BEANS

EDIBLE SOY BEANS are the food of the future! The tremendous food value of soy beans has long been known but the difficulty has been to develop a variety that would cook and bake soft so as to be edible. Edible Soy Beans are invaluable for making your own bean sprouts throughout the year.

The original seed was brought to the U. S. by Mr. Morse of the U. S. Dept. of Agriculture and was bred up and developed by Prof. Geo. M. Briggs of the University of Wisconsin and his associates. Matures in 85 days. Soy Beans are a substitute for meat; when green they are as good as fresh peas; cooked or baked, they taste somewhat like navy beans; roasted, they taste like peanuts. And they are of untold value for diabetics since they are low in starch! Fine for canning and freezing.

BANSEI—An early variety, plants 24 in. tall, pods many, 2½ in. long, with 2 to 3 beans each, that cook and bake perfectly. Matures in 120 days. 4312—2 Oz. Pkg., 9c; 2 pkgs., 16c; ½ lb., 22c; lb., 37c; 2 lbs., 68c; 5 lbs., \$1.35, postpaid. See Page 57 for quantity prices.

A Dish of Bansei Soy Beans

MENDOTA—A new edible soy bean, developed by Prof. O. B. Combs of the U. of Wis., 10 days earlier than Bansei, and cans and freezes perfectly! Plants 28 in. high, very prolific, disease resistant, high in vitamins, fine for sprouts. Supply limited. Each pod contains 2 or 3 beans. Cooks and bakes deliciously soft. 4313—2 Oz. Pkg., 15c; 2 pkgs., 27c; 3 pkgs., 35c, postpaid.

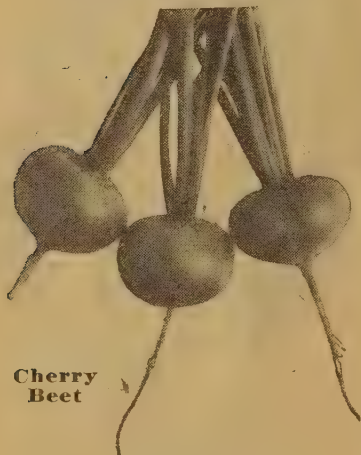

DETROIT DARK RED

Cannot be surpassed for main crop purposes. One of the largest beets grown and a heavy cropper, producing large, globe-shaped roots, delicious, tender, and fine grained, small tap-root, and free from any trace of woodiness or stringy tendency. Succeeds equally well at all seasons and is one of the best to sow in spring to succeed the extra early and medium crop sorts.

The skin is an attractive blood-red and the flesh is dark red, practically zoneless. It is a popular variety for canning retaining its fine color exceptionally well. Leaves are dark green, shaded with red, tops are small and grow upright. The flesh is solid, always tender and of a decidedly sweet flavor. Matures in about 50 days. Most valuable for succession sowings. A great favorite, not only with market gardeners who grow for profit, but likewise with the home gardener. **Re-selected seed.** 159—Pkg., 10c; oz., 28c; ¼ lb., 85c; ½ lb., \$1.55; lb., \$2.95, postpaid.

161—Detroit Dark Red, Salzer's Cliffwood Farm **TRIPLE-A-TESTED**—A special re-selected strain certified by **THREE-WAY** tests. Pkg., 15c; oz., 33c; ¼ lb., 98c; ½ lb., \$1.85; lb., \$3.45, postpaid.

SALZER'S CHERRY BEET

Cherry Beet

Salzer's Cherry Beet is a small, early beet, maturing in 52 days and is especially fine for canning and pickling whole at 1¼ to 1½ inches in diameter. Roots are smooth, even in size and shape and almost perfectly globular. Tops and tap roots are very small. The flesh is an intense deep crimson, free from white zones, elegant in quality.

Yields heavily. The flesh is fine grained, sweet and tasty. Fine for both home and market.

160—Pkg., 10c; oz., 27c; ¼ lb., 80c; ½ lb., \$1.50; lb., \$2.85, postpaid.

SALZER'S RED BEAUTY

See Color Illustration, Opposite Page

Very early, uniform in size, perfect turnip shape, fine grained, tender, the richest and darkest red of any beet. Salzer's Red Beauty is a mighty good beet to plant and those who have once planted it, see to it that they have some of this fine strain in their garden every year. Its uniformity and its rich, attractive, dark red color sell the beets on sight at market, and for the home garden it not only produces tender, delicious, extremely early beets for table use, but the color is retained when cooked, making them most attractive for both canning and pickling.

Remarkable for its uniform, perfect shape; roots are always smooth, with but a small tap-root, are of medium size, flesh is finely grained, very sweet, always free from woody fibres, and the skin and flesh are the darkest red of any beet. The leaves are dark green and shaded with red, are very small and of upright growth, allowing close planting. A heavy cropper, maturing in about 40 days. 166—Pkg., 15c; oz., 30c; ¼ lb., 92c; ½ lb., \$1.70; lb., \$3.25, postpaid.

SALZER'S CELTUCE

The superb vegetable with a real taste thrill from the interior of China! The young leaves are eaten as lettuce and the matured stalks are peeled of their tough outer skin and the heart eaten either raw, or cooked. Celtuce is truly delicious, with a taste all of its own, perhaps slightly like celery, but different and milder.

Celtuce is really a distinct species of lettuce, but grows differently and has more uses. The young leaves are used as lettuce or cooked like spinach. As a raw vegetable, the stalks are peeled and cut into five-inch lengths and split lengthwise, chilled, and served like celery or raw carrots. Also delicious cooked like asparagus or in soups. Sow seed from early spring to July 1. 356—Pkg., 15c; 2 pkgs., 25c; ½ oz., 65c; oz., \$1.25; ¼ lb., \$4.65; lb., \$16.00, postpaid.

SWISS CHARD

Celtuce, One Stalk Cut Lengthwise

Is grown for its stalks and leaves which are tasty and healthful. Yields a constant crop from July until winter. The stalks may be cooked like asparagus, the leaves like spinach.

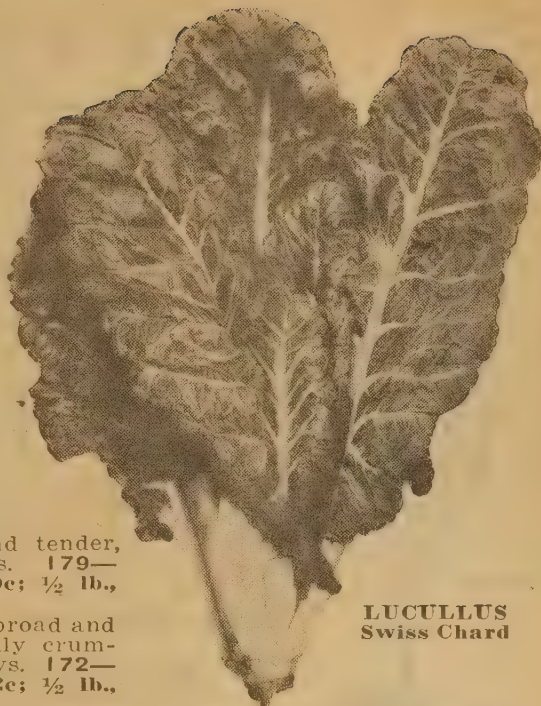

Salzer's Tampala

large stalks and very large leaves, heavily crumpled and tender, of superior quality. 55 days. 179—Pkg., 12c; oz., 20c; ¼ lb., 59c; ½ lb., \$1.10; lb., \$1.95, postpaid.

LUCULLUS. Stalks large, broad and thick. Leaves tender, heavily crumpled and of fine flavor. 55 days. 172—Pkg., 10c; oz., 18c; ¼ lb., 52c; ½ lb., 95c; lb., \$1.75, postpaid.

LARGE RIBBED WHITE. Very broad, thick mid-ribs; leaves plain and hence preferred by many. Tender, fine quality. 55 days. 169—Pkg., 10c; oz., 17c; ¼ lb., 49c; ½ lb., 90c; lb., \$1.65, postpaid.

SALZER'S RUBY CHARD. The stalks are a bright crimson, with the rich green leaves heavily crumpled. Lovely appearance, fine quality, very tender! 55 days. 180—Pkg., 15c; 2 pkgs., 25c; oz., 55c; ¼ lb., \$1.90, postpaid.

LUCULLUS
Swiss Chard

SALZER'S TAMPALA

An old Chinese vegetable, that produces its excellent greens in mid-summer, when spinach bolts to seed, and much finer than Swiss Chard. The leaves are cooked and served just like spinach.

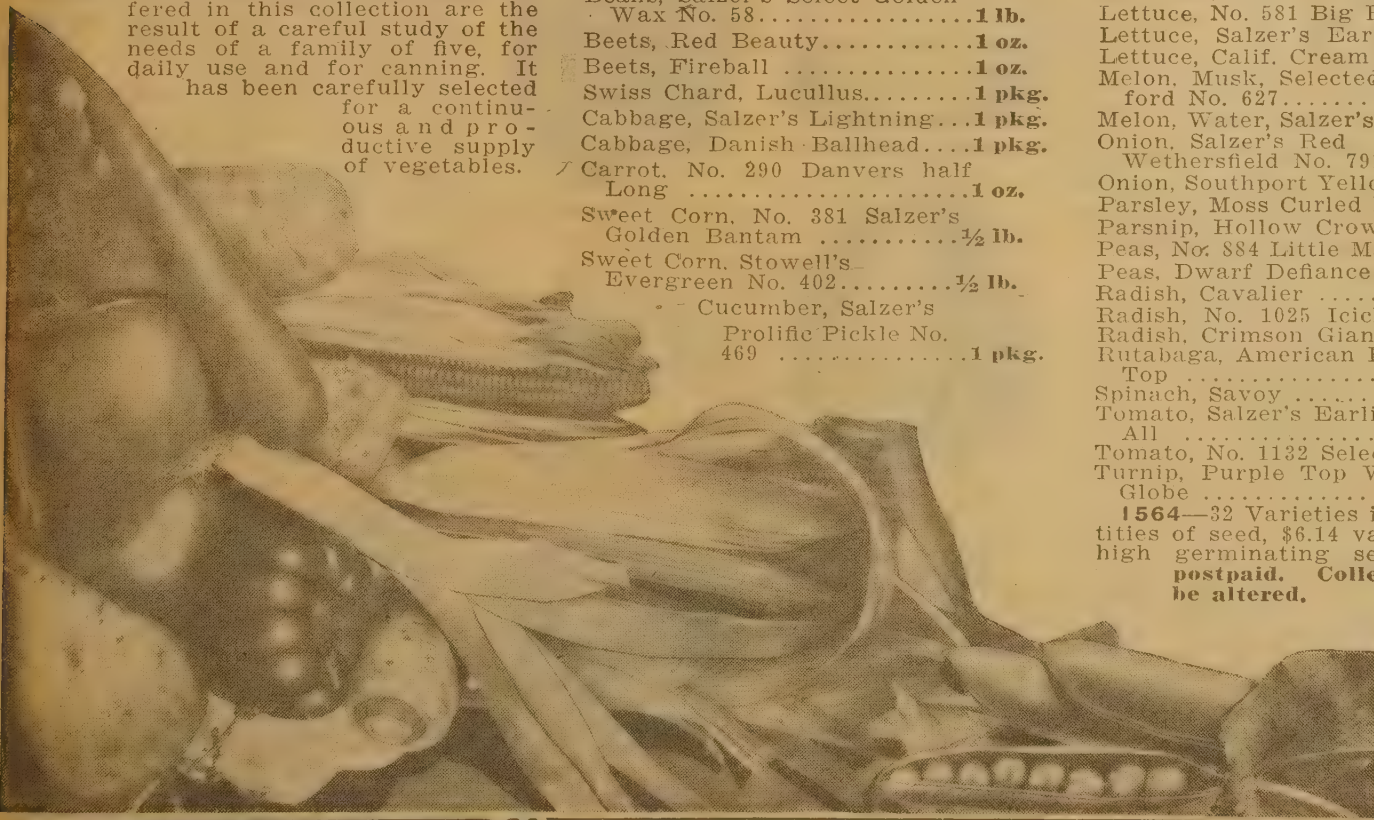

Tampala retains its tenderness for a long time, in fact it requires only five minutes to cook. The branches 4 to 5 in. long may be gathered instead of individual leaves and the young stem tips and leaves may be cooked together. Larger stems (as thick as one's finger) may be separated and cooked 10 minutes like asparagus. Or use Tampala in salads, instead of lettuce. Tasty flavor, high in food value, easily grown, and grows over a long period! 1110—Pkg., 15c; 2 pkgs., 25c; ¼ oz., 60c; ¼ oz., \$1.00; oz., \$3.50, postpaid.

Cabbage Plants in Two Inches of Snow

Note: Due to the severe drouth in the South last spring, plants were not as nice as usual and could not be dug regularly, which delayed shipment of orders. We hope for normal weather this year again.

Frost Proof—That is exactly what we mean; in fact, we claim more than that. If the plants do not withstand twelve degrees below freezing (20 degrees above zero) we will either replace them or refund your money. Nor is that all, you can plant Salzer's Frost Proof Plants out in the open just as soon as you can get them into the soil. Once in the soil, the land freezing, or the plants being covered with ice, sleet or snow will do no injury, unless the temperature gets below 20 degrees above zero (frequently not then).

SPECIAL NOTICE

The plants when received may be somewhat wilted and have a stunted appearance. Regardless of appearance, they will produce results superior to common or home grown plants.

Be sure to state when we shall send your Cabbage Plants, otherwise we will use our own judgment. Shipping weight 25 lbs. per 1000 plants. Plants will be shipped direct from our growing station. Available from January 15 to June 15. We cannot accept orders for 25 plants of one variety.

Salzer's
Lightning

CABBAGE

SALZER'S LIGHTNING

Salzer's Lightning Cabbage is an extremely early cabbage, very valuable for the home garden, for the market gardener, and for shipping. The handsome heads are conical or pointed, and are usually about 8 inches long, about 6 inches thick near the base, and are firm and solid. The heads average 2½ pounds in weight, which is remarkable when one considers its earliness.

First introduced by us in 1889, Salzer's Lightning was pronounced by one and all the greatest addition for the past FIFTY YEARS to the cabbage family. Produces fine sized, marketable heads in 75 DAYS FROM SOWING OF THE SEED. Thousands of gardeners are now depending on our Lightning for their first early crop. It is very hardy, always sure to head and almost always the **earliest in the market**. The heads are blanching. The plants resist cold and are very hardy, are compact, have but very few outer leaves, can therefore be planted closely together and yield a large crop per acre.

OUR LIGHTNING is often ripe and solid when other sorts are still in leaves. We consider it without an equal in earliness, richness and deliciousness of flavor. No vegetable pays better than early cabbage. If you are a market gardener, you will want this; if you have a city garden, you cannot get along without it. If you wish the **EARLIEST CABBAGE** in the world, you must plant **SALZER'S LIGHTNING**.

Good keeper. 221—Pkg., 15c; ½ oz., 31c; oz., 54c; 2 oz., 99c; ¼ lb., \$1.85; ½ lb., \$3.60; lb., \$6.95, postpaid.

SALZER'S GIANT FLAT DUTCH

**SURE
SAFE
SOLID**

**SUREST
HEADER**

The Grandest, Best Keeping, Surest Heading, Large Cabbage in the World

For over one half a century this grand cabbage has held absolute sway as the undisputed leader of all late flat cabbages. So famous and well-known has it become, that it is not an uncommon occurrence for stores to give the preference to market gardeners who can furnish them with these large, solid, heavy cabbages. It is surprising how many of the retail customers insist upon purchasing only Salzer's Giant Flat Dutch Cabbages for their winter use. They know that its flavor, quality, and tenderness is unequalled by any other variety.

Always In Great Demand

On the city markets, the attractive, fine appearing heads sell themselves to thrifty purchasers. The home gardener who once plants this superb variety, finds it so far superior in every respect to any other late sort that he has ever tried, that where Salzer's Giant Flat Dutch has once gotten a foot-hold in a garden, it has never been supplanted by other varieties, but is sown year after year. Unsurpassed in quality and taste, sureness of heading, weight, size, attractiveness, far superior for sauerkraut and slaw. Once planted, always planted. Pronounced everywhere to be the greatest late flat cabbage ever introduced, and the finest of any in existence.

A Sure Header

For sureness in heading and regularity in growth, SALZER'S GIANT FLAT DUTCH certainly heads the list. Heads are 12 to 14 inches in diameter, averaging 18 to 20 pounds in weight. It forms every time, very large, very hard, solid heads, crisp, tender, sweet, uniform in shape, color and handsome appearance. It has a very short stem, is a very compact grower, forms few loose leaves, which

turn into the head and if planted closely will yield enormous crops. Reports of 999 marketable heads from 1,000 plants set out are of frequent occurrence. It keeps well until late in Spring and is good for shipping.

Price of Salzer's Giant Flat Dutch Cabbage; 250—Pkg., 15c; ½ oz., 30c; oz., 54c; 2 oz., 97c; ¼ lb., \$1.84; ½ lb., \$3.45; per lb., \$6.50, postpaid.

Gives Big Results Everywhere

Mrs. C. K. Brandt, R. D. 1, Box 559, Reedley, California, writes,

"Your Giant Flat Dutch Cabbage is a wonderful variety. Heads were big and solid. We used your seeds in Southern Texas 35 years ago, and they do just as well in California."

Annie E. McMullen, Brush Valley, Pennsylvania, writes,

"Your Giant Flat Dutch Cabbage is giving an excellent stand of plants. Have used this for several years."

Mr. Fred Wiggers, R. D. 2, Lincoln, Illinois, writes,

"For late cabbage, we have never found anything in the last ten years that equals Salzer's Giant Flat Dutch."

Mrs. John Corressell, R. D. 2, Mt. Vernon, Indiana, writes,

"We tried Salzer's Giant Flat Dutch Cabbage last year and were very well pleased with it."

It is the cheapest in the end as everyone knows, and whenever you go out in the garden to get some carrots for dinner, you will be mighty glad that you planted Salzer's Earliest Coreless this spring.

It is a beautiful variety. It is exceptionally uniform in shape, of fine texture and entirely free of any heart and is very early, maturing about a week ahead of all other half long sorts, although fully as productive as any of them, the roots usually measuring 6 to 7 inches in length and 1½ inches through.

Salzer's Earliest Coreless in shape and color is one of the most handsome of Carrots. The roots are of cylindrical form, blunt at the end, very symmetrical, smooth skin, fine neck and small top. The color is a beautiful red, brighter and deeper than that of any other Carrot. It is a color that will draw the attention of the buyer on the market.

But the greatest feature of this fine variety is the entire absence of the stringy, coarse heart or core found in so many Carrots. It is of most delicious quality and owing to the fine texture of the red flesh and its tender, delicate flavor, Salzer's Earliest Coreless is called the sweetest of all Carrots by all those who have tasted it.

CELERY

BETTER QUALITY EARLIER

SALZER'S WONDERFUL

Also called Golden Plume!
Earliest in maturity, superior eating quality, increased size, beautiful golden color, superior keeping qualities, marked resistance to rust and blight,—these are the outstanding characteristics of this superb celery.

Salzer's Wonderful produces fine stocky plants with large, broad, thick stalks that blanch easily and quickly to a beautiful clear waxen yellow. They are solid, crisp, brittle, tender, of a much superior flavor and quality, and are entirely free from stringiness of any kind. Trials at Cliffwood Farms prove it to be the very earliest celery. This extra earliness spells top prices from the early fall trade, for the trucker, and the earliest, most delicious, crisp and beautiful celery for the home gardener's table use.

Mr. H. L. Premo, Brooks, Minn., writes, "We raised some beautiful celery from your seed, and were especially well pleased with the Wonderful Celery."

The plants are remarkably resistant to blight and rust, a factor of great importance. Earliness, size, attractive color, shape, superior flavor, resistance to blight and rust!—the name WONDERFUL is about the only fitting one for this celery.

345—Pkg., 10c; ½ oz., 36c; oz., 70c; 2 oz., \$1.30; ¼ lb., \$2.35; ½ lb., \$4.25; lb., \$8.00, postpaid.

SALZER'S GOLDEN SELF-BLANCHING

The beautiful appearance of the plant, with its close habit, compact growth, and straight, vigorous stalks is indescribable. The ribs are thick, broad, fleshy and the hearts large and solid. As the plants mature, the inner stems and leaves turn to a beautiful golden yellow. Blanches easily, quickly, and perfectly.

Salzer's Golden Self-Blanching is a vigorous dwarf grower and very early. It is easy to cultivate and in every way a desirable variety. It is planted very extensively, and owing to its handsome, waxen-yellow color, its superb quality, entire freedom from stringiness, crispness and tenderness and its delightful, rich, nutty flavor, this variety is most popular and the leading celery in many markets. The strain we handle is grown in the U. S., it is one of the finest in the market and produces plants uniform in growth and color, with heavy, solid stalks.

333—Pkg., 15c; oz., 89c; 2 oz., \$1.65; ¼ lb., \$2.85; ½ lb., \$5.25; lb., \$9.95, postpaid.

SALZER'S SELF BLANCHER

Thick Heavy Stalks, Beautiful, Silvery White Color

Salzer's Self-Blancher has been bred from the White Plume, over which it is a great improvement. It blanches more readily, is earlier, grows more stalks, is heavier and is a much better keeper than the old variety.

Next to Salzer's Wonderful it is the earliest celery that can be grown. We introduced Salzer's Self-Blancher a number of years ago and have kept on improving it year after year, and we believe that now it is more largely grown than any other self-blanching variety. Is of dwarf and compact habit, with light green foliage, stalks are thick and solid, unusually meaty, of a delicious rich flavor, pure white, heavy, tender and crisp. As it keeps so exceptionally well, it is widely grown for fall and winter use.

Many people who have never been able to grow celery before can grow this one to perfection, and succeed with it as well as with other vegetables.

SALZER'S EARLIEST SUREHEAD

IT HEADS WHERE OTHERS FAIL

Grandest of all! Whether for forcing or open ground, planted early or late, it is the best, surest header of all. It is particularly desirable for forcing under glass. On our trial grounds every plant produced a SUPERB HEAD AND SURPASSED ALL OTHER VARIETIES OF EQUAL SIZE IN EARLINESS AND QUALITY.

The plants are of strong growth with erect, dark green, pointed leaves growing closely about the heads, which are pure snowy white, with very close and compact curds of wonderfully fine quality. The heads are of large size, often reaching 10 inches or more in diameter.

This sureness of heading is highly essential to the market gardener and just as necessary for the home gardener. To make the best heads, cauliflower plants need cool, moist weather, good soil and thorough cultivation. Salzer's Earliest Surehead matures in about 95 days and is a sure header.

SALZER'S FIRST CROP

A grand, distinct, extremely early variety. A splendid market gardener's variety, with stone-hard, snow-white heads.

Being of dwarf, compact growth, with but a small number of leaves, it is an ideal Cauliflower for forcing during winter and spring. Severe tests have proved it absolutely certain to head when conditions are ordinarily favorable, and also most uniform in growth, type and maturity, the crops being taken off almost clean at the first cutting. One characteristic of this novelty is the close sitting together of the leaves, enfolding the head tightly and causing the inner leaves almost to cover the flower, thereby avoiding the necessity of early tying up.

The heads are very beautiful, solid, snow white, of medium size, which will find a ready sale at the highest prices everywhere and will never fail to be appreciated.

DRY WEATHER OR DANISH GIANT

Produces stone-hard and snow-white heads, unsurpassed in quality, which average larger than those of the Salzer's Surehead, but are a week later. The foliage is very heavy, fully protecting the heads, which are less liable to blight in hot weather than those of the earlier sorts. As indicated by the name, for dry, hot climates it is to be

preferred to all other sorts, being a sure header there when other sorts fail. Even in the driest weather, it is of a vigorous growth.

SALZER'S EARLIEST LETTUCE

**EARLIEST CURLED OR LOOSE LEAVED LETTUCE.
DELICIOUSLY CRISP AND TENDER, EASIEST
TO GROW**

Yields an abundant crop of attractive light green leaves, heavily curled, of remarkably crisp texture, and of the finest flavor. The quality and flavor even of the outside leaves is fully equal to if not better than the tender heart leaves of many heading varieties. Salzer's Earliest is one of the most widely planted in all sections of the country, and especially in the great West. It is such a strong grower that it thrives everywhere.

It is an admirable variety for outdoor planting, especially in early spring and it is also most suitable for greenhouse forcing. It is the lettuce for planting all summer long. Extremely popular for winter markets. The lower leaves grow clear of the ground so that it rarely suffers from rot. It is an ideal shipper and will prove most profitable for the grower, whether he sows seed in a hotbed or out of doors. We consider it the best non-heading lettuce for the home garden. Salzer's Earliest Lettuce affords crisp, tender, attractive, finest quality leaves long before the heading sorts have commenced to close up.

540—Pkg., 15c; oz., 28c; ¼ lb., 82c; ½ lb., \$1.45; lb., \$2.75, postpaid.

WHITE SEEDED SIMPSON

Also known as Early Curled Simpson. A curled or crisp non-heading type, medium large, much crumpled leaves of a light green color. It is an early growing, hardy variety and is sure to give fine results even under unfavorable conditions. Tender, crisp and of excellent quality.

559—Pkg., 7c; oz., 20c; ¼ lb., 59c; ½ lb., \$1.10; lb., \$1.95, postpaid.

SALZER'S GRAND RAPIDS

Curled or crisp, non-heading, light green, leaves wavy, fringed and very curly, a good shipper. Very popular and widely grown.

BLACK SEEDED SIMPSON

One of the standard varieties. A non-heading, curled, bunching, crisp variety, attractive light green color. It reaches a large size, grows quickly, is early, of fine quality, tender and sweet, and thrives splendidly during the hot summer months. Easily grown by the home gardener and much used by market gardeners for hot bed culture.

SALZER'S PRIZEHEAD LETTUCE

Is one of the best and most reliable varieties for all-year-around cultivation. The name is a trifle misleading, as it is a loose leaved or curled variety, and does not make a head. Plants form a loose cluster of leaves which are exceedingly tender, quite blistered and crumpled, sweet, crisp, and are of light brown color varying to a medium green base. Salzer's Prizehead reaches a very large size without losing its tenderness or crispness. 575—Pkg., 10c; oz., 20c; ¼ lb., 59c; ½ lb., \$1.10; lb., \$1.95, postpaid.

CLIFFWOOD SUMMER HEADER LETTUCE

CLIFFWOOD SUMMER HEADER

A superb head lettuce that we introduced in 1927, that forms solid heads despite hot weather, a thing which has hitherto been almost impossible. In tests on our Cliffwood Farms, practically every plant formed a fine, firm, solid head of butterhead lettuce of the finest flavor during the heat of summer.

The leaves are light green, crumpled, thick and tender, blanching to creamy white in the center of the head. Heads are large, about 8 to 10 inches in diameter, they have a delicious rich, buttery flavor, and they are the last to go to seed. It stands heat better than any other variety, without wilting.

577—Pkg., 14c; oz., 30c; ¼ lb., 92c; ½ lb., \$1.68; lb., \$3.10, postpaid.

IMPROVED HANSON

Exceptionally early, large globular, crisp heads which are firm and well blanched. The leaves are broad, crumpled and twisted, of light green color, never spotted or brownish. It is of very sweet flavor, and succeeds everywhere and at all times. It heads well during hot weather.

562—Pkg., 10c; oz., 26c; ¼ lb., 77c; ½ lb., \$1.45; lb., \$2.75, postpaid.

SALZER'S CRISP AS ICE

A beautiful lettuce of medium size and medium early. Salzer's Crisp As Ice is a cabbage butter head lettuce, the leaves having a rich, attractive, deep green base, and upper portion covered with dark brown, giving the plant a deep brown or bronze appearance. A cool weather variety, valuable for both early spring and fall.

Has a rich, creamy heart, and when cut open is so crisp and brittle, it was given the name "Crisp As Ice."

556—Pkg., 12c; oz., 29c; ¼ lb., 88c; ½ lb., \$1.65; lb., \$3.05, postpaid.

Ideal for the home garden. The heart of this excellent head lettuce is a rich golden yellow and has a most agreeable and delicate buttery flavor, hence the name Cream Butter. It is of first class quality, and it forms a fine solid head under any ordinary conditions.

NEW YORK OR WONDERFUL LETTUCE

A curled or crisp heading variety, large, dark green and slightly curled on the edges. It is the most extensively grown of any of the head lettuces by market gardeners, and it is likewise in much favor with home gardeners everywhere. The mature head is flattish globular, and has well folded leaves with the immediate outside leaves slightly incurved to protect the head from sunburn. The heads range from 16 to 18 inches in diameter and weigh from 3 to 3½ pounds each.

The heart is beautifully blanched, creamy white, crisp, tender, and free from any trace of bitterness. It is robust and is a standard hot weather variety. 565—Pkg., 10c; oz., 29c; ¼ lb., 88c; ½ lb., \$1.65; lb., \$3.10, postpaid.

547—New York or Wonderful, Salzer's Cliffwood Farm TRIPLE-A-TESTED—A special reselected strain certified by THREE-WAY tests: Pkg., 15c; oz., 37c; ¼ lb., \$1.14; ½ lb., \$2.10; lb., \$4.00, postpaid.

NEW YORK NO. 55 LETTUCE

Similar to the New York lettuce above, but the color is a brighter green and the head is somewhat better formed, and smoother. Resistant to tipburn and sure heading in warm weather. It is the surest heading strain of the New York type that we know of and practically every plant makes a good head even during hot weather. Considerably resistant to tip burn.

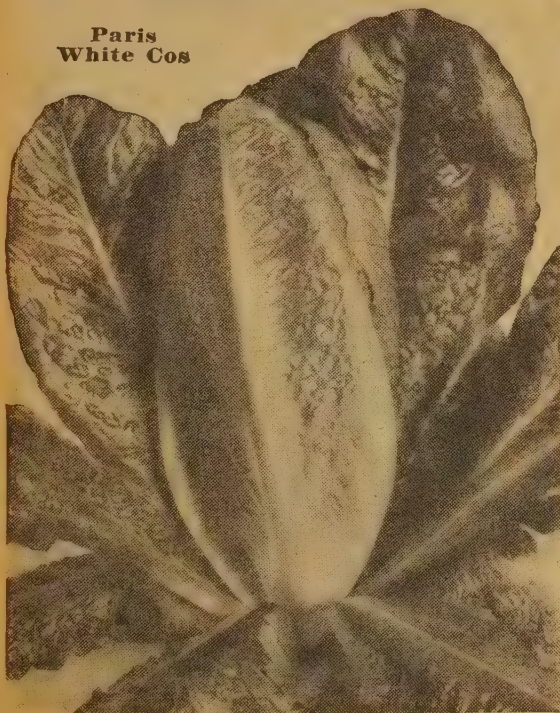

Heads are large, solid, crisp and attractive. New York No. 55 may also be sown late, sowings made about August 1 producing good heads up to heavy frosts. 568—Pkg., 15c; oz., 29c; ¼ lb., 88c; ½ lb., \$1.65; lb., \$3.10, postpaid.

SALZER'S BIG BOSTON

A cabbage head, butter type, medium large, about 11 inches across, finely shaped, globular, medium light green with a slight tinge of brown on margins of outer leaves. It is early and hardy, and stands shipping well. The leaf is smooth and is practically not blistered or crumpled, with a tendency to a bright sheen. Heads are tender, brittle, juicy, fine buttery flavor, and the interior is an attractive light golden yellow. 553—Pkg., 5c; oz., 20c; ¼ lb., 59c; ½ lb., \$1.10; lb., \$1.95, postpaid.

CREAMY HEART LETTUCE

A black-seeded cabbage head lettuce of the butter type, medium green color and of medium size. The head is firm and solid and the heart is a very rich cream color. It has a very firm, tender, buttery flavor, matures early, is slow to go to seed, and stands the heat of summer well.

It is much superior to many of the other butter types of lettuce, both in quality, earliness and ability to form sound, solid heads. Is considered a sure header. 579—Pkg., 9c; oz., 26c; 2 oz., 48c; ¼ lb., 77c; ½ lb., \$1.42; lb., \$2.75, postpaid.

SALZER'S ICEBERG LETTUCE

PARIS WHITE COS LETTUCE

Cos Lettuce is distinguished from other lettuce in that the leaves are elongated and somewhat spoon-shaped. It is grown exactly like other lettuce. When full grown, it forms a loose, conical head. Very crisp, tender, and has a delicious flavor. Succeeds very well everywhere, never wilts under the severest sun and can be grown to an immense size. 598—Pkg., 9c; oz., 24c; ¼ lb., 72c; ½ lb., \$1.34; lb., \$2.50, postpaid.

CHINESE OR CHICKEN LETTUCE

In this variety you will find a grand feed that yields more than other green feeds, and that is excellent for poultry. When cut, it grows rapidly again, and may be cut again and again. The yield is extremely heavy; grows 3 to 4 feet high and does not form a head. For table use, it perhaps will be found too coarse. 578—Pkg., 7c; oz., 20c; 2 oz., 37c; ¼ lb., 62c; ½ lb., \$1.18; lb., \$2.10, postpaid.

SALZER'S EARLIEST

RIPE MUSKMELON

10 CENTS
PKG.

Earliest of All. Our attention was called to this Melon many years ago by a market gardener near La Crosse, who for the past years has always had Muskmelons from 8 to 15 days ahead of his neighbors. These Melons were of uniform size, of fine shape and appearance, yellow fleshed, extremely delicious, and sold readily in our markets from \$1.25 to \$2.00 per dozen, the profit to an acre being something enormous, as all the Melons were usually sold before other sorts came into the market.

THIS IS THE EARLIEST YELLOW-FLESHED MUSKMELON that we know of, being ready for the market in about 60 days after planting. It is of oval shape, as may be seen by the illustration, of good size, about five inches in diameter, with fairly distinct ribbing, heavily netted. The flesh is exceptionally thick, of a rich salmon-yellow color, sweet, luscious and melting, and the flavor is unsurpassed by that of any other variety. The vines are robust and vigorous, resisting blight to a marked degree. 606—Pkg., 10c; oz., 27c; ¼ lb., 80c; ½ lb., \$1.50; lb., \$2.85, postpaid.

PRIDE OF WISCONSIN

Also called Queen of Colorado. An improvement on Sugar Rock or Honey Rock Muskmelon. The shape, heavily netted rind and the color are the same, but the delicious orange colored flesh is thicker and meatier, and the seed cavity smaller. 637—Pkg., 15c; oz., 24c; ¼ lb., 72c; ½ lb., \$1.34; lb., \$2.50, postpaid.

SALZER'S SUGAR ROCK MUSKMELON

7 CENTS
PKG.

A Type of Muskmelon That Is Creating a Sensation! Also Known as Honey Rock!

Salzer's Sugar Rock is one of the most prolific melons on the market today. It is strikingly attractive and distinct from all other sorts. Fruits are oval, of good large size, without ribbing and heavily netted. Matures in about 80 days.

Four characteristics describe this melon: productiveness, striking appearance, quality, and ability to stand shipping and handling. The flesh is deep and thick, orange color, with a sugary and luscious flavor that is unequalled today. It is so aromatic that one melon, uncut, will scent a room with its sugary odor.

The outside rind is light golden yellow overlaid with heavy gray netting, and is so tough that ripe melons may be picked and then shipped a long distance and arrive in good condition. Vines are strong and vigorous and do not show any trace of blight. 626—Pkg., 7c; oz., 23c; ¼ lb., 69c; ½ lb., \$1.23; lb., \$2.35, postpaid.

SALZER'S JUICY FRUIT

Salzer's Juicy Fruit, introduced by us over fifteen years ago, is the grandest salmon-fleshed melon in cultivation today. It is medium early, it is a tenderly sweet, it is a heavy yielder, it is very meaty and it has a small seed cavity.

Mr. Lester R. Ekiss, R. D. 1, Roanoke, Ill., writes, "I've raised quite a few melons in my days but none can beat Salzer's Juicy Fruit."

The skin is an attractive light green, the fruits reach a very large size, they are nearly round with slight sutures, and the thick salmon colored flesh is the sweetest, that we have ever eaten. The melons are uniform in size and pack nicely ten to a crate. This elegant melon is ideal for the home gardener, and truckers always find a heavy demand for the melons at market.

Parsnip

SALZER'S HOLLOW CROWN

Parsnips prefer very wet soil and will thrive where carrots will not grow. A freeze is required to sweeten them. For the best results, deep soil is needed.

Salzer's Hollow Crown is enormously productive, roots are 10 to 12 inches long and about 3 inches thick at the shoulder. It is rich in saccharine, has smooth white skin, is uniform in shape, is sweet, tender, sugary. Not only of fine table quality, but very desirable for stock feeding. Also relished by horses. Matures in 130 days. 832—Pkg., 10c; oz., 23c; 2 oz., 39c; ¼ lb., 69c; ½ lb., \$1.25; lb., \$2.35, postpaid.

IMPROVED SHORT THICK

This new little parsnip makes a fine garden vegetable. The tops are very small, the roots are short and thick, about 3 inches through and about 6-7 inches long. Its short, thick character make this parsnip easier to pull than the older sorts, and it does not require such deep soil. Has a sweet, delicate flavor. 119 days. 836—Pkg., 10c; oz., 24c; 2 oz., 44c; ¼ lb., 75c; ½ lb., \$1.35; lb., \$2.50, postpaid.

SALZER'S DELMONICO

This nationally famous strain, introduced by us, does not require such deep soil for its cultivation. It is a stump rooted variety and hence easily harvested. Roots reach a length of about 8 inches, with a thick broad shoulder, skin is smooth and white, and the flesh is fine-grained, sweet, sugary, tender and most excellent for table use. Very early, maturing in about 115 days. It is a most prolific yielder, it contains more saccharine, is sweeter and more nutritious than other sorts, and as it is so easily harvested, large acreages are grown for stock feeding. Thrives on almost any soil. This splendid variety surpasses every other in yield and quality. 833—Pkg., 12c; oz., 29c; 2 oz., 54c; ¼ lb., 92c; ½ lb., \$1.70; lb., \$3.25, postpaid.

IMPROVED GUERNSEY

Heavy yielder, smooth roots, flesh fine grained and of an excellent flavor. It is half-long, thick and short, and is easily dug. A dependable type. 834—Pkg., 10c; oz., 24c; 2 oz., 44c; ¼ lb., 75c; ½ lb., \$1.35; lb., \$2.50, postpaid.

Rhubarb—SALZER'S MONARCH

Rhubarb is used extensively for making tarts, pies, sauces and preserves. No plant is more easily increased and multiplied than rhubarb. No other Rhubarb excels Monarch in richness, tenderness, juiciness, earliness, or freedom from stringiness. See Index for Roots. 1053—Pkg., 10c; oz., 28c; ¼ lb., 85c; ½ lb., \$1.58; lb., \$2.95, postpaid.

SALZER'S PARAMOUNT Exquisitely curled, deep green color, and highly ornamental for garnishing purposes, with a spicily pungent flavor! The plants grow about 12 inches tall and the texture is more uniformly and attractively "triple curled" than older strains. Of exceptionally deep rich green color.

Paramount is a great improvement over the older sorts and is a striking variety for uniformity in type of plant and color. 828—Pkg., 12c; oz., 20c; ¼ lb., 59c; ½ lb., \$1.10; lb., \$1.95, postpaid.

DOUBLE MOSS CURLED—Grows about 7 or 8 inches high, is of rich dark green color and is a handsome decorative type, the leaves being beautifully crimped and curled; often used as a border for beds and walks and is unsurpassed for garnishing meat dishes, etc., and for flavoring soups and other dishes. SALZER'S GIANT EXHIBITION

Huge Pods—Luscious Quality Peas

To those who wish huge podded peas, we suggest that they plant Salzer's Giant Exhibition. It is a late maturing kind. Is a wrinkled pea, very productive, the huge pods being well packed with peas, which, although large, are of a fine quality, sweet, sugary flavor and not tough as one would expect. The pods frequently grow to seven and even eight inches in length, depending of course somewhat on the soil, and it is not unusual to find between ten and twelve peas to the pod. The lateness of Salzer's Giant Exhibition is fully offset by its productiveness and its vigor-ousness. It has numerous first prizes to its credit, from various fairs, which accounts for its being named Exhibition. One of the best main crop varieties. Good for freezing.

Pods rather straight, with curve near end. Vines grow vigorously. Ready to use in about 85 days. 872—2 Oz. Pkg., 15c; 2 pkgs., 24c; ½ lb., 28c; 1 lb., 49c; 2 lbs., 92c; 5 lbs., \$1.95, postpaid.

TASTYGREEN

Tastygreen, the wonder vegetable, is rich in protein, mineral matter, and other elements so necessary to the development and maintenance of the human system. "Greens" are highly essential to our well-being, and of these, Spinach is perhaps the most widely planted and the most widely used, although unpalatable to many.

Tastygreen, the wonder vegetable, is far superior to Spinach or any of the other greens, and has a delicious flavor all its own, slightly and agreeably pungent with a Mustard taste when served hot, and when eaten raw, the flavor somewhat resembling raw Turnips. Tastygreen has small thin roots, about two inches long, and large oblong shaped leaves, rich dark green color, with a narrow white center rib. The leaves, stem and all, are prepared for table use in the same manner as Spinach or Turnip greens. It is very prolific and bears abundantly. The plants grow quickly and are ready to use in 21 to 23 days after planting.

Salzer's Tastygreen is the best "greens" we have ever used, so productive, so tender and so tasty. Just picked another fine mess.—Mrs. A. G. Putman, 3013 East New York, Indianapolis, Ind.

Salzer's Earliest of All Tomato

Although introduced by us many years ago Salzer's Earliest of All is still the leading extra early tomato, the earliest large-sized variety grown and we believe, as we are constantly improving it, it will hold its position and will stay on top as the **Earliest of All**.

With us in the North it has always been a study to produce extremely early vegetables, such as will ripen and produce perfect fruit in a short time, and in Earliest of All our efforts have been successful. Everybody who has tried it speaks of it in highest praise. Earliness in tomatoes is essential for the market grower and highly desirable for the home garden. Salzer's Earliest of All is the best extra-early so far produced; it is our very earliest strain; it is a "short season" tomato. Ripening in about 57 days, after setting out the plants, it is especially adapted to all sections of the country, which makes it so decidedly popular. Finely bred for uniformity in size, attractiveness, extra earliness, and trueness to type, Salzer Quality is nowhere better evidenced than in this fine, highly praised variety. If you want the very earliest tomatoes, combined with fine flavor, meatiness, productiveness, attractiveness, and

tenderness, you should plant our Earliest of All. It is bound to please the most particular.

The fruits are of good size, brilliant scarlet color, nearly round, entirely smooth, and remarkably handsome. The flesh is solid, and of the finest flavor. The fruits are borne continuously in large numbers until killed by frost. They have a tough skin, firm flesh, making them good shippers and keepers.

Mr. G. Rumpf, 5633 E. 16th Terrace, Kansas City, Mo., writes, "I harvested 20 bushel of the finest all around tomatoes from 80 plants of Salzer's Earliest Of All Tomatoes." Mr. Zelle F. Mills, Box A, Bartlett, Ill., writes, "We especially liked your Earliest Of All Tomatoes last year." Mr. Roy Rider, Roll, Ariz., writes, "Our Earliest Of All Tomatoes were the earliest we ever had." Mr. Arthur G. Leathers, R.D. 1, Bunker Hill, Ill., writes, "I had 300 Salzer's Earliest Of All Tomato Plants and sold \$79.00 worth of tomatoes, and I gave lots away. Had the earliest tomatoes here."

Price of Salzer's Earliest of All: 1118—Pkg., 15c; ½ oz., 42c; oz., 77c; 2 oz., \$1.40; ¼ lb., \$2.60, postpaid. See Page 14 for Tomato Plants.

Firesteel Tomato

FIRESTEEL

See Color Illustration on Page 47.

A sensational new red tomato weighing from 12 to 15 ounces each, borne in clusters of 3 to 5, that matures in 67 days! Firesteel runs uniformly to large size tomatoes, not only immense size at the first picking but clear to the end of the season. There are very few small tomatoes.

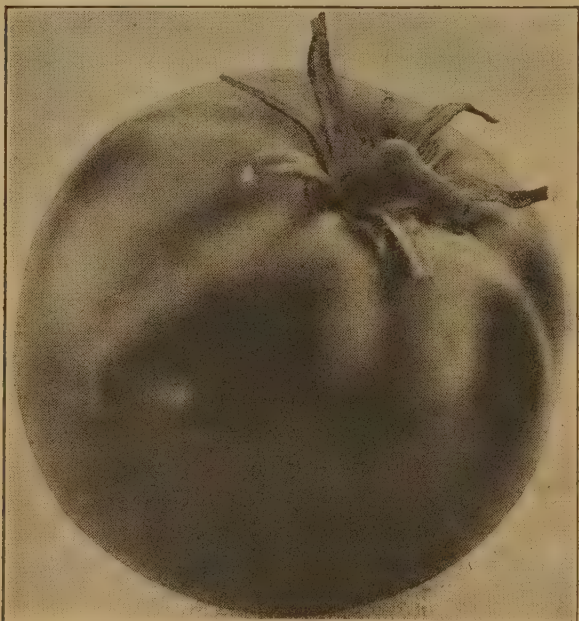

Firesteel is of globe shape, smooth skin, of elegant flavor, free from acidity, exceedingly solid and meaty, ripening to a beautiful dark crimson red all over at the same time. Vine medium, vigorous, fairly open, with medium foliage. Firesteel has set heavy crops no matter how dry and hot the weather. Scarlet Topper is enormously prolific and yields a heavy tonnage of tomatoes of large size. Vines are medium dense, erect, and SELF-TOPPING. The main shoot, after forming two or three-flower clusters, usually terminates in a flower cluster, checking vegetative growth much the same as cutting out the top, hence the name. 78 days. Fine for the home gardener. 1163—Pkg., 10c; oz., 49c; 2 oz., 90c; ¼ lb., \$1.65, postpaid.

Peak of Perfection

COLOR-TRU SEED—The seeds of this variety have been stained VIOLET to insure customers receiving true seed. Accept no other.

If it is size you want, and just a luscious, deliciously good, all around tomato, then you must plant Salzer's Peak of Perfection!

We gave free seeds of this tomato to our customers and friends in 1927 under the name of New Wonder and offered prizes for the largest tomato grown and for the best name for this beauty. Mr. Acro Castle, Hueysville, Ky., won the prize of \$25.00 cash for the largest tomato with a weight of 4 pounds 7 ounces. Think of a monster tomato like that! Mr. I. G. Haycroft, 7 East Washington St., Kensington, Md., writes, "I grew an enormous crop of smooth large tomatoes from your Peak of Perfection, so fine that they sold readily at \$1.50 per bushel." Mrs. Alfred Poertner, R.D. 2, Cedarburg, Wis., writes, "Your Peak of Perfection Tomatoes averaged 14 ounces each, and I expect to raise 5,000 plants this year. Also found them drought resistant."

Peak of Perfection is practically free from seeds. The tomatoes are of a beautiful appearance, uniformly large and smooth, with a rich dark crimson skin, meaty, and have a delicious, melting flavor. All esteem it the finest flavored tomato they have ever eaten. But combined with this delicious flavor is the enormous size! 90 days. 1131—Pkg. 17c; ½ oz. 49c; oz., 93c; 2 oz., \$1.75; ¼ lb., \$3.25, postpaid.

RUTGERS

Originated by Prof. Schermerhorn of the New Jersey Agricultural Experimental Station. Rutgers is outstanding for the large size and solid structure of the fruit! Skin is dark red, with thick outer and inner walls, very small seed cavities, and the interior color is a beautiful dark red.

Matures in about 85 days and the yield is very large, ripening an abundance of fruit even in the far northern climates, before the vines are killed by frost. It makes juice of low acidity and fine flavor and is a good canner, maintaining its firmness and deep red color when canned. Especially good for light sandy soils since the vines offer much protection for the fruit. Has yielded over 10 tons per acre! 1120—Pkg., 15c; ½ oz., 29c; oz., 53c; 2 oz., 98c; ¼ lb., \$1.75, postpaid.

MARGLOBE, DISEASE-RESISTANT

Marglobe is a cross between the Marvel and Globe tomatoes, developed by the U. S. Department of Agriculture, combining the second earliness of the former with the fine table quality of the latter. Marglobe is of fine scarlet color, globe shaped, of fine texture, deliciously mild in flavor, and wilt-resistant to a marked degree. Plants are of vigorous and heavy growth and very prolific. We have a record of one plant, on diseased soil, producing 107 large, fine round, best quality tomatoes. 80 days. Fine for tomato juice. Gives fine satisfaction in all sections. 1130—Pkg., 10c; ½ oz., 27c; oz., 47c; 2 oz., 88c; ¼ lb., \$1.59, postpaid.

We had some beautiful tomatoes from Salzer's Peak of Perfection. They were firm, fine fleshed and of perfect shape.

**SALZER'S
IMMENSE
FERRIS
WHEEL
TOMATO**

SALZER'S FERRIS WHEEL

The tomato is recognized by the medical profession as holding five points of merit which makes it actually indispensable in the vegetable garden. It is the richest of all foods in vitamins; it is the most wonderful and effective blood cleanser of all foods; it is the best of all

vegetables for keeping the stomach and intestines in condition; it is an extraordinary tonic for the kidneys, and it is used widely in curing diabetes and Bright's disease. In addition, it is extremely valuable for feeding the juice to infants, accomplishing wonders in cleansing and building up the tiny stomachs. Every garden in the U.S. should contain at least a few tomato plants. Plant some this year!

Salzer's Ferris Wheel is of the large Ponderosa type and averages about 1 3/4 pounds in weight, although at Cliffwood Farms we have grown specimens weighing over 4 pounds. Fruits have thick, solid, meaty flesh, which is of the finest quality, delicious, sub-acid flavor and very small seed cavity. The vines are strong and vigorous and easily bear their enormous weight of fruits which are of handsome appearance, smooth, and which have a rich, dark purplish-crimson skin. Salzer's Ferris Wheel has been continually developed for immense size, uniformity, flavor, productiveness and to resist any tendency to split. Matures in about 90 days. A grand tomato for the home gardener as well as for market gardeners. Mrs. W. H. Pfaumer, 427 E. Wallace St., Fort Wayne, Ind., writes, "My friends marveled at the size of Salzer's Ferris Wheel Tomatoes last year. One weighed three pounds." Mrs. Mike Kaminski, R.D. 3, Box 369, Thorp, Wis., writes, "I had grand success with your Ferris Wheel Tomatoes. We are very pleased with Salzer's Seeds."

1139—Pkg., 15c; 1/2 oz., 45c; oz., 85c; 2 oz., \$1.60; 1/4 lb., \$2.95, postpaid.

SALZER'S IMPROVED PONDEROSA

Rightly named "Ponderosa" because of the large size it attains. Fruit is very solid, with few seeds. Very often large tomatoes, from their very size, are rough and have a tendency to split, but we selected this seed so exhaustively that we have removed the roughness and splitting tendency as far as it is possible to do so.

Vines are vigorous and productive. Fruits large, oblong, purplish red, with thin skin. Flesh is solid, with a very small seed cavity, making it a most desirable variety for slicing. To all who desire large size, solidity and flavor, we unhesitatingly recommend it. Requires about 85 days to mature. Mr. F. C. Litts, 36 Conklin St., Poughkeepsie, N. Y., writes, "I had exceptionally good results from Salzer's seed last year. The Ponderosa Tomatoes were just about perfect."

1142—Pkg., 10c; oz., 93c; 2 oz., \$1.75; 1/4 lb., \$3.25, postpaid.

1133—Improved Ponderosa, Salzer's Cliffwood Farm TRIPLE-A-TESTED seed: Pkg., 15c; oz., \$1.15; 2 oz., \$2.15; 1/4 lb., \$3.75, postpaid.

Salzer's Select Stone

King of the red tomatoes! The leading main crop variety, extensively grown by market gardeners, ideal for the home garden. Grown extensively by canners for tomato soup, etc. Best of all for tomato juice.

Vines are large, strong and productive. It is a smooth, large tomato, nice and solid, free from core and cavity. Nearly round in shape. The eating quality is exceptionally fine, has no superior for slicing or canning. Fruits are bright scarlet. Our strain of this variety is carefully grown, selected, rogued and cured. Matures in about 85 days.

1122—Pkg., 5c; oz., 44c; 2 oz., 82c; 1/4 lb., \$1.35, postpaid.

1132—Select Stone, Salzer's Cliffwood Farm TRIPLE-A-TESTED — A special reselected strain certified by THREE-WAY tests: Pkg., 10c; oz., 49c; 2 oz., 92c; 1/4 lb., \$1.65, postpaid.

Salzer's Firesteel Tomato did extra well. It bore as early as any, and for two months after other kinds had ceased.—

**SALZER'S
IMPROVED
PONDEROSA**

SALZER'S OXHEART TOMATO

A very popular late variety, maturing in 90 days. The fruits are very large in size, often weighing one to two pounds each and even more, are purplish-pink in color, smooth, the shape of a beef heart, and with such a solid internal structure that there is very little room left for seed.

Oxheart is of very mild and sweet flavor which is preferred by many people to the more acid flavors. Is a choice tomato for salads, with its thick, delicious flesh! The flesh often shows an inch thick, without a single seed cavity. Receives its name from its shape, which is large at the stem end, tapering almost to a point. Vine growth is open and spreading, the fruits setting in clusters of 3 to 7.

1177—Pkg., 15c; ½ oz., 49c; oz., 93c; 2 oz., \$1.75; ¼ lb., \$3.25, postpaid.

SALZER'S NORTON WILT-RESISTANT

If you have been troubled with wilt, plant Norton Wilt-Resistant Tomato. Has yielded 300 bu. to the acre on soil affected by wilt, while other varieties next to it, yielded 25 bu. The tomatoes ripen nice and solid on the vines. Firm, solid skin, is a wonderful shipper, of fine flavor, meaty, few seeds and very tender. Is a mid-season tomato, globular, and of a beautiful scarlet color. Fine for tomato juice.

1129—Pkg., 10c; oz., 54c; 2 oz., \$1.00; ¼ lb., \$1.80, postpaid.

SALZER'S TENDERLOIN

The meatiest tomato grown, Tenderloin is the only fitting name for this splendid variety! The fruits are large and heavy, with thick walls, small seed cavities, few seeds, luscious and tender flesh, are borne in great profusion, and even though they reach such a large size, they do not easily crack or split. Its beautiful bright red color, smooth skin and handsome, attractive shape, always commands attention. At market, it fetches high prices, and home gardeners are enthusiastic over the heavy, meaty fruits of Salzer's Tenderloin. 1134—Pkg., 15c; ½ oz., 52c; oz., 99c; 2 oz., \$1.89; ¼ lb., \$3.55, postpaid.

It is also wise to order early because of railway congestion. We make no charge for bags or packing. Ceiling prices or lower on all seeds.

IMPORTANT NOTICE

Our Market Gardeners' Wholesale Prices apply only on an order totaling ten pounds or more of seed. That does not mean that you must buy ten pounds of any one variety, but a total, all told, of ten pounds or more of any seed, entitles you to the Market Gardeners' Wholesale Prices given on this special price list. MILORGANITE

The Safe, Non-Burning Fertilizer

Analyzes 6% nitrogen, 2% phosphate, 0% potash. Nitrogen carrying fertilizers are short for the duration. For lawns, three applications a year, one in early spring, one in early summer, and another in the fall (4 to 5 lbs. per 100 square feet on old lawns; 5 to 6 lbs. on new lawns) will assure you a better lawn. 5525—5 lbs., 53c; 10 lbs., 87c, postpaid to 4th zone. Not prepaid: 25 lbs., 75c; 50 lbs., \$1.35; 100 lbs., \$2.50.

SHADY PLACE MIXTURE

Not all grasses are grown successfully in shade or partial shade, and we have therefore prepared this mixture of fine leaved grasses that are naturally adapted for this purpose. We recommend sowing early in Spring, if possible before the ground is shaded to any great extent, using one pound to 150 square feet. If the ground has been densely shaded and is sour, it is well to apply some slaked lime as well as commercial fertilizer. Use 1 lb. to 150 square feet. Contains no timothy. 4527—1/2 lb., 34c; 1 lb., 62c; 2 lbs., \$1.20; 5 lbs., \$2.90, postpaid. Not prepaid: 10 lbs., \$5.15; 25 lbs., \$12.60; 100 lbs., \$49.00.

GRIDIRON GRASS MIXTURE

Build your lawn with Salzer's Gridiron Lawn Grass Mixture! Salzer's Gridiron Lawn Grass Seed is our finest mixture of various fine leaved grasses, including red top, fescues, blue grass, etc., in the right proportions, tough and strong, carefully blended to give one a strong, durable, luxurious and permanent lawn under trying circumstances. The great American game of football makes terrific demands upon the gridiron fields, and the name "Gridiron" suits this mixture admirably.

Sow one pound to every 200 square feet. Salzer's Gridiron Lawn Grass Mixture, of course, contains no timothy. 4539—1/2 lb., 33c; 1 lb., 60c; 2 lbs., \$1.15; 5 lbs., \$2.75, postpaid. Not prepaid: 10 lbs., \$4.95; 25 lbs., \$12.00; 100 lbs., \$47.00.

SPECIAL LAWN GRASS MIXTURE

Not the most expensive, nor yet the cheapest, but the best general all around and all purpose Lawn Grass Mixture that we catalog, and the most popular. In addition to a carefully blended mixture of the best grasses, blue grass, red top, etc., Salzer's Special Mixture contains the proper percentage of Dwarf White Dutch Clover, always desirable for the lawn.

Customers should not be guided by price alone, in purchasing their lawn grass seed, but should also consider quality and the final results. An abnormally low priced mixture may be very apt to contain considerable chaff.

Sow the seed early, as soon as frost is out of the ground, to enable the young grass to get a good start before any weeds appear. Contains no timothy. Sow one pound to 200 square feet. 4529—1/2 lb., 30c; 1 lb., 55c; 2 lbs., \$1.05; 5 lbs., \$2.55, postpaid. Not prepaid: 10 lbs., \$4.40; 25 lbs., \$10.75; 100 lbs., \$41.50.

Wilt-Resistant Asters

Loss of seedlings or transplanted plants, stunted, one-sided and off color plants in those that survive, dark colored streaks in the stem, yellowing of the upper leaves and death of the lower leaves are characteristics of Aster wilt or Aster stem-rot. The wilt organisms are capable of prolonged existence in one's soil and the only remedy is WILT-RESISTANT SEED.

This seed is practically immune to wilt and stem rot and produces flowers on soil upon which ordinary seed would not possibly grow. In one severe test, plants from this wilt-resistant seed grew splendidly while 93% from ordinary seed succumbed. We offer wilt-resistant seed of the following:

SALZER'S FROST PROOF PANSIES

Biennial. Salzer's Frost Proof Pansies are what their name implies; they successfully winter through the severe climate of this north country and bloom long after frost. For a number of years Frost Proof Pansies at our Cliffwood Farm have delightfully surprised us with the number of beautiful blossoms we pick during the cold months.

The flowers themselves are very large, often measuring 3 inches across, and are produced in a beautiful variance of colors from deepest black to snow white. Myrtle R. Dobberstein, R.D. 3, Box 40, Sleepy Eye, Minn., writes: "Your Frost Proof Pansies are lovely and of exquisite colors, and truly giant in size. They are still blooming (Oct. 4)." Mrs. Thomas M. Seiber, R.D. 2, Box 111, Iuka, Ill., writes: "Last spring I planted a packet of your Frost Proof Pansy Seed and they wintered through fine. The flowers are larger than any I have seen at the Greenhouses."

We are able to give you varieties in straight colors as listed, or straight blended Cliffwood mixture in all colors of bronze, blue, mahogany, yellow, mauve, black, etc.

PINK DEAN KAY 'MUM

SUMMER FLOWERING 'MUMS

Salzer's Summer Flowering Chrysanthemums are just what their name implies,—they start flowering in July! These Summer 'Mums have commenced blooming with us on July 20 and have continued their extravagant display until cut down by hard frost. One lady in Biloxi, Mississippi, states that Salzer's Summer 'Mums started to bloom for her on May 20th and she expects to still have blooms on Christmas!

We know of no finer advance in recent years, than in these 'Mums! They resemble Salzer's Cushion 'Mums except that they make a distinctly larger bush and that they bloom earlier and continue to bloom much longer. They develop into plants about two feet high and with a three foot spread, and produce masses of bloom. They are also hardier, having weathered through unusually severe winters. And if anything, they bloom more profusely! We consider them the most important introduction of recent years. Exceedingly fine for in front of shrubbery or for landscaping.

We offer four lovely colors:

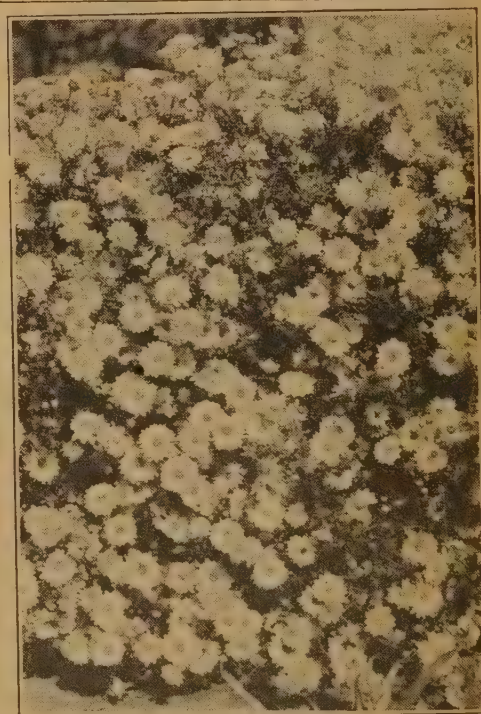

Canary Dean Kay—Rich deep yellow semi-double flowers.

Orchid Dean Kay—Lovely clear orchid, large flowers, early.

Pink Dean Kay—Clear deep pink semi-double flowers.

Red Dean Kay—Brilliant crimson, double flowers, very striking.

Price: Any of above: Each, 65c; 3 for \$1.75; 4 (or 1 of each) for \$2.20; 6 for \$3.15; dozen, \$5.95, postpaid.

1½ to 2 bu. sow one acre; 48 lbs. in one bushel.

The Best Barley for Malting Purposes.

Wisconsin Barbless or Wisconsin Pedigree No. 38 Barley is a bearded variety that was originated by the Wisconsin Experiment Station by crossing a smooth awn oat from Russia with Oderbrucker barley. It is a remarkably heavy yielder, with heavy, large and plump kernels.

The greatest feature of all, however, is the freedom from the troublesome awns in the beards. The smooth beards of Wisconsin Barbless Barley make it easier to handle and makes both the straw and the grain more valuable for feeding. It is six rowed, has very stiff straw and is resistant to disease. It is a big improvement over the rough bearded barleys. Resistant to stripe disease. Sow 1½ to 2 bu. per acre.

Salzer's California Giant Asters

This marvelous type is the finest Aster in cultivation today, and commands the highest price at the cut-flower markets of all of our large cities. No less, does it make the best display of any Aster in the garden. Annual.

It is a cross between the Beauty Type of Aster and the Crego Aster, combining the vigorous tall growth of the former with the lovely, double, large flower of the latter. Salzer's California Giant is practically non-lateral, but instead, carries its blooms at the end of its long stems, without the small side branches, producing enormous flowers of wonderful substance on strong, stiff stems 20 to 24 inches long. The flowers measure 5 to 6 inches in diameter, with long petals that fluffily curl across each other and produce an exquisite bloom that has no equal.

Wherever exhibited, this superb Aster has won prizes and received awards of merit. Mrs. E. L. Watts, 1105 East 7th Ave., Corsicana, Texas, writes: "Your California Giant Asters were lovely. A local florist saw them and said they were larger than his own." Mr. Adolph Saladine, 113 E. Michigan St., Marquette, Michigan, writes: "We were very well pleased with your Asters last year."

CLOVER MEDIUM RED

Medium Red, the most important clover, lives two years or more, grows about two feet high and makes two crops a year, yielding about three tons of cured hay per acre. Clover hay is very nutritious, stock fed on it requiring less grain. Does well on a great variety of soils, thriving luxuriantly on strong, well drained loams. It is the best for crop rotations and increases succeeding crops from 25 to 60%. Sow 15 lbs. per acre. Our Radium Brand Clover is among the finest obtainable. It is our best grade, and tests around 99% in purity; the most of it is 99½% or better, and it is free from noxious weeds. Our Superior Brand tests about as high, free from noxious weeds, but it is not quite as fancy in appearance. Wisconsin, Minnesota, and Idaho grown. Bags free.

WHITE CROSS OR WISCONSIN PEDIGREE No. 19—A high yielding extra early white oat, with a taller straw and a larger kernel than is usually found in early oats. The tall straw is desirable in localities where the soil is light. A good rust-resister. Has a tendency to lodge on rich soils, but is well adapted to sandy soils. 4625—Prices above.

STATE'S PRIDE OR WISCONSIN PEDIGREE No. 7

Earliest yellow oat. In spite of unfavorable weather, State's Pride yielded 75.7 bushels per acre. Earliest of all yellow oats and best as a nurse crop and escapes rust, because of its earliness. Does not lodge easily, but fills out the kernels if it does, making it especially desirable for rich soils. Has a very short, stiff straw. It is a yellow oat, bright, thin hulled, meaty and is about the best oat. 4623—See prices above.

60-DAY, JULY OR KHERSON—It is a small, yellowish oat with a very thin hull and practically all meat, and with short, stiff straw. Does not lodge easily. Sixty Day Oats are extremely early and are especially fine in a dry season. They usually yield 70 to 80 bushels per acre, at least. It adapts itself readily to the different soils. Matures in about 80 days, rather than 60 as the name indicates. 4616—See prices above.

SALZER'S SILVERMINE—This variety is reputed for its heavy yields and is a fine second early white oat, very robust and vigorous and seldom lodges. The heads are borne low on strong, stiff straw which is unusually bright and clean. The kernels are white, plump, heavy and thin hulled. Endures extremes of dry, wet, hot and cold weather. 4615—Lb., 31c; peck, \$1.13, postpaid to 4th zone. Not prepaid: Peck, 75c; 1/2 bu., \$1.20; bu. VICLAND OATS—Vicland is an early yellow oat, very high in bushel weight, that has yielded over 85 bushels per acre, very resistant to rust and to smut!

On rich soil, the straw reaches a good height but on poor soil the straw is apt to be too short to cut with a binder. Vicland will stand in the shock a long time without germinating, which is most desirable in rainy weather. 4607—Price of Vicland Oats: Peck, \$1.03, postpaid to 4th zone. Not prepaid: Peck, 65c; 1/2 bu., \$1.00; bu. (32 lbs.), \$1.75; 3 bu., \$5.15; 6 bu., \$10.10; 9 bu., \$14.85. Three bags (9 bu.) plants five acres. Certified Seed: 3 bu., \$6.85; 9 bu., \$19.95, not prepaid.

SALZER'S WHITE BONANZA White Bonanza is a heavy mid-season variety, extremely productive, with strong, stiff straw, bearing long heads filled with good-weight grain. It has demonstrated its ability to produce fine crops on sandy land and on the fertile prairie or clay loam soils. A dependable white oat that ripens in about ninety days. This variety is hardy, having been grown successfully in Canada, in sections about 1,000 miles northwest of La Crosse. "Bonanza" is our own Registered Trade Mark. 4614—Lb., 32c; peck, \$1.17, postpaid to 4th zone. Not prepaid: Peck, 79c; 1/2 bu., \$1.25; bu. VANGUARD OATS A mid-season white oat from Canada, open panicle, high yielding and resistant to black stem rust! The straw is stiff. We recommend it highly, especially for Northwestern Minnesota and similar latitudes. 4627—Lb., 31c; peck, \$1.13, postpaid to 4th zone. Not prepaid: Peck, 75c; 1/2 bu., \$1.20; bu. REED'S CANARY GRASS

Or Phalaris. A grass for wet, low-lying, poorly drained soils—in fact, the only grass we know of for reclaiming waste, marshy lands.

The hay is a little coarse, especially if it is left to grow too long, but it is nutritious and tasty and all stock like it and relish it. Underground stems will form a tough sod and hold hay machinery. Yields up to 4.57 tons of hay per acre from two cuttings. Cut the first crop for hay as soon as the heads or panicles appear.

Broadcast 5 to 6 lbs. per acre or drill in 1/2 in. deep, 2 to 3 lbs. in 18 in. rows. If covered with water, wait till the water recedes and then sow. 4511—Radium Brand—Lb., 70c; 2 lbs., \$1.29; 5 lbs., \$2.98, postpaid to 4th zone. Not prepaid: 10 lbs., \$5.25; 50 lbs., \$24.65; 100 lbs., \$48.75. Bags free.

SALZER'S BILLION DOLLAR GRASS (Panicum Crusgalli)

Especially Valuable for Silo and for Feeding Green—A Substitute For Corn Fodder
Green Feed on August 1st

Salzer's Billion Dollar Grass furnishes a heavy amount of desirable green feed during August! Sown about the end of May, the fodder will be ready to cut about August 1st or a little earlier! Begin to cut it before it blossoms and continue to cut for about 12 days or until the stems toughen. By making a second seeding about June 10 and a third about June 25, abundant green feed may be had during all of August and with later seedings, into September!

Salzer's Billion Dollar Grass gives a heavy yield of green fodder, from 12 to 18 tons per acre on naturally moisture-retentive land in good condition, but heavier yields of up to 35 tons per acre have been reported. Yields anywhere up to 60 bushel of seed per acre (35 lbs. per bu.), although 90 bushel of seed per acre have been reported, and it yields from 3 to 6 tons of hay per acre.

A Quick Producer

Salzer's Billion Dollar Grass produces green feed, and plenty of it, in about nine or ten weeks and attains the height of four to seven feet according to the richness of the soil. It is the one grass to sow if you want plenty of green feed during August and September for your cattle, horses, sheep, hogs and poultry.

Up to 90 bushel (3,150 lbs.) of seed per acre! Hogs, poultry, geese and turkeys relish the green feed and thrive and fatten if fed the seed during the fall and winter months.

By cutting as soon as the plants come into bloom, a second crop may often be had and the yield of forage materially increased. When grown for seed, it gives only the one crop and sometimes some pasture thereafter.

Salzer's Billion Dollar Grass gives 3 to 6 tons hay per acre but as it is rather coarse and succulent it is difficult to cure for hay and we do not recommend it for that purpose. Since it is difficult to dry, the hay may become musty and so one cannot depend upon a large amount of dry hay. However, if the weather allows several extra hay days to follow one another, it is successfully cured in small cocks as clover is often cured.

Use Salzer's Billion Dollar Grass as silage in place of corn wherever it is not possible or convenient to grow corn. It is a wonderful "catch crop" whenever the corn has been destroyed by hail or otherwise.

Where It Grows

It grows best on a soil that is rather retentive of moisture and quite rich. It luxuriates on a low, rich, moist situation but it also does well on higher ground. When it is sown on retentive soil, it endures drought fairly well. On the rich soils of the West and Northwest where there is sufficient moisture, or where there is irrigation, it yields heavily and it has given good yields on the alkali soil

so common in parts of the West. In the Mississippi Valley, it yields abundantly.

It Is Productive

Under average conditions of moisture and fertility of the soil, Salzer's Billion Dollar Grass is one of the most productive of the annual hay grasses. Think of yields of up to 20 tons of fresh green feed per acre, up to 6 tons of cured hay per acre, or up to 3,000 pounds of seed per acre! Its biggest and its greatest value, however, is in its green fodder and in its silage.

Feeding Green

Salzer's Billion Dollar Grass cut from day to day and fed green to cows, is much relished. Cows invariably increase in milk when green Billion Dollar Grass is alternated with corn fodder.

Fed continuously and alone, Billion Dollar Grass acts as a laxative and a diuretic, and the ideal feeding is about 10 pounds hay per day plus about 50 pounds green Billion Dollar Grass per day.

For Silage

Over 18 tons ensilage per acre! Billion Dollar Grass is not as nutritive as corn silage, yet it makes a very fine silage and makes a fine substitute if the corn crop fails or if corn cannot be grown. For ensilage, cut in late bloom or when the seed is beginning to form. If cut after it has ripened its seed, it will then be too dry and tough. Filling the silo with two parts by weight of Salzer's Billion Dollar Grass and one part of Soy Beans makes a very superior silage.

What It Is

Panicum Crusgalli is a Japanese Millet and was given the name Barnyard Millet in 1896 by Prof. W. P. Brooks of the Hatch (Mass.) Station. In 1901, we first offered it to the public and gave it the name Billion Dollar Grass because of its tremendous yield of fodder and seed, and it is probably more widely known today under this name than any other. It is not poisonous at any stage of growth and is distinct from Sudan Grass.

Culture

Salzer's Billion Dollar Grass is a tender annual and should not be sown before corn planting time as it does not stand frost. Sow about 20 pounds per acre broadcast, covering about 3/4 inch deep. May be sown up to July 1 and even up to the end of July.

PASTURE—All rich, luxuriant grasses should be pastured moderately at first. Therefore, you should turn in your hogs, cattle, sheep, and horses the first few times only after they have had a good feed elsewhere and thus accustom them to it. It is on the same plan as hungry stock turned the first time into a field of rich clover—they might find harm. Turn them into Billion Dollar Grass moderately at first and you can soon permanently.

FOR HAY—Cut when the plant is in early bloom. Cut with a mower and allow it to cure in the swath for a day; then rake into windrows and when sufficiently cured, put it into cocks for about a week.

FEEDING GREEN—Begin to cut before it blossoms and continue until the cattle do not eat all of the stems.

FOR SEED—Let Salzer's Billion Dollar Grass get thoroughly ripe and cut and thresh as you would Timothy. The seed is about equal to oats in composition, that is in protein and fat.

CRESTED WHEAT GRASS

Is reclaiming millions of acres of arid land on our northern great plains. SALZER'S "LAUGH AND GROW FAT" HOG PASTURE MIXTURE

One of the most vexing questions with every farmer during summer is a rapid meat producing hog pasture.

"Laugh and Grow Fat Mixture" contains generally among others the following: Billion Dollar Grass, Turnips, Amber Cane, Soy Beans, Speltz, Field Peas, Rape, Vetches, Oats, Rye, Millet, Timothy, Clover, Rye Grass, etc. It is well in ordering this Mixture to tell us whether you want it for early or late planting and the condition of your soil. Sow 30 to 50 lbs. per acre. Greedily eaten by hogs and all other livestock. 4549—Radium Brand: Lb., 32c; 5 lbs., \$1.10, postpaid to 4th zone. RED TOP (Solid Seed)

Red Top grows under a greater variety of conditions than almost any other grass. It is the best wet land grass next to Phalaris, and it will grow on soils so poor in lime that other kinds fail entirely. Red Top will thrive on almost every type of soil except sand. Sow 8 pounds per acre.

SUDAN GRASS

Salzer's Sudan Grass is one of the most prolific hay crops ever grown; it gives two crops of hay a season. As a catch crop, it is fully equal to Millet. Sudan Grass is used for pasture, ensilage and soiling as well as for hay. It does best on a rich loam soil, but grows successfully on almost all soils from a heavy clay to a light sand. Sow 25 to 35 lbs. per acre, after corn planting time.

We had fine results last year with Salzer's Early Six Weeks Potatoes. They keep well.—Mr. L. J. Sawyer, 21 Lake Ave., Walpole, Mass. 107

SALZER'S EARLY SIX WEEKS POTATOES

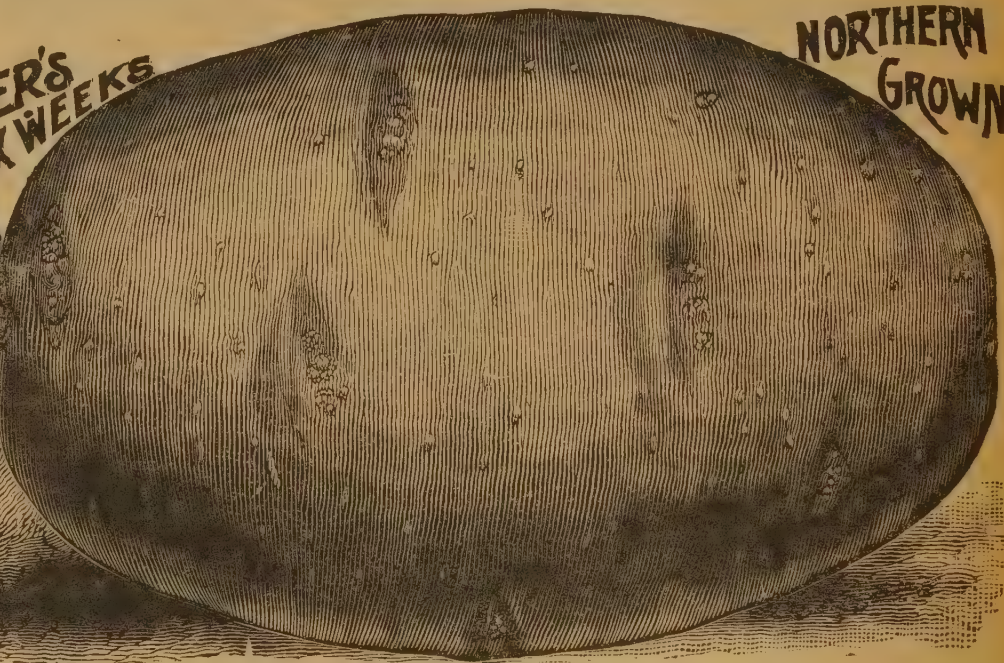

We are nationally known as the largest retail seed potato house in the country, and we probably handle more potatoes than any other company. Our seed is grown in the fertile Eagle Valley and Red River Valley of Northern Minnesota, two districts which have not as yet been surpassed for quality seed. Prices should not be judged by the price of eating potatoes. Our potatoes are grown primarily for seed purposes and all of them are U. S. Gov't. Grade No. 1. We believe you will be well pleased with them. U. S. Grade No. 1 requires that the potatoes be practically free from scab, blight, dry rot and damage caused by disease, and be graded to a minimum size of 1 1/8 inches. 60 lbs. in one bushel.

Salzer's Early Six Weeks stands alone as the great earliest general purpose Potato! It is ahead of Salzer's Earliest in quality and yield, although not quite so early, but is 10 days earlier than the famous Early Ohio Potato. There is another great advantage in planting Salzer's

Early Six Weeks Potatoes and that is that it has never failed to produce a good crop of extremely early, very large tubers.

Salzer's Early Six Weeks is fit for market everywhere in just about six weeks. It is good for midsummer, good for late summer, good for fall, and magnificent to put into winter quarters, where it will keep splendidly and give you the finest flavored, best quality eating Potatoes imaginable. If we had but one Potato to plant, this would be the Potato every time.

Skin is pink and smooth. The flesh is white and cooks mealy. Round to oblong in shape. Salzer's Early Six Weeks Potato is one of the best market varieties for all sections of the country. Please give date we shall ship your potatoes. Price of Salzer's Early Six Weeks: U. S. No. 1: 2 lbs., 39c; 5 lbs., 69c, postpaid to 4th zone. Not prepaid: 10 lbs., 60c; 25 lbs., \$1.30; bu. Tubers run uniform, medium to large in size, oval in shape, with blunt, rounded ends, and shallow eyes.

Vines are upright, allowing easy cultivation, and the tubers are set in a compact clump near the surface so that digging is easy. Adapted to every locality in the U. S. Yields heavily.

U. S. No. 1: 2 lbs., 37c; 5 lbs., 67c, postpaid to 4th zone. Not prepaid: 10 lbs., 53c; 25 lbs., \$1.25; bu. (60 lbs.), \$2.85; 100 lbs., \$4.15; 500 lbs., \$20.50. Bags free on all potatoes. Prices subject to change with ceiling.

KATAHDIN

Katahdin promises to become the best late potato. Yields heavily and keeps beautifully. See illustration on Page 108.

The tubers of Katahdin are short, elliptical to roundish, very shallow eyes, white skin, firm white flesh, and cook up dry and mealy. Elegant for baking. The skin is smoother than the Rural and it peels with less tare. In shape it is nearly a ball.

U. S. No. 1: 2 lbs., 38c; 5 lbs., 68c, postpaid to 4th zone. Not prepaid: 10 lbs., 58c; 25 lbs., \$1.27; bu. (60 lbs.), \$2.87; 100 lbs., \$4.20; 500 lbs., \$20.75. Bags are free on all potatoes. If wanted in barrels, add 75c for each 3 bu. barrel. Prices on all potatoes are subject to change April 1 and May 1. Order early and we will ship your order on any date you specify.

RUSSET RURAL

Does best on clay soils and black soils, but it is a universal sort for all soils. It will perhaps stand more neglect and do better under unfavorable conditions than any other main crop sort. Its shallow eyes are few and far between. Flesh white and mealy, and is scab proof and disease resistant to a marked degree. The tubers are nearly round, flattened with a slightly russet skin. Is a late potato and a good drought resister. Red River Valley grown. U. S. 1: 2 lbs., 38c; 5 lbs., 68c; postpaid to 4th zone. Not prepaid: 10 lbs., 58c; 25 lbs., \$1.27; bu. (60 lbs.), \$2.87; 100 lbs., \$4.20; 500 lbs., \$20.75.

JERUSALEM ARTICHOKE

Excellent for diabetics, using the roots or tubers just like potatoes, either baked, fried, boiled, in soup, or in salads! Jerusalem Artichokes contain Inulin and authorities find that these may be assimilated when diabetics cannot safely take any other carbohydrates.

Also excellent as a farm crop, using the tops for fodder or silage and the tubers as feed for cows, chickens and hogs. Dig what you need for winter and leave the balance in the ground until spring. In storage, store them in layers with damp burlap bags between layers. Diabetics may order this seed stock for immediate use.

Price: 2 lbs., 45c; 5 lbs., 88c; 10 lbs., \$1.40, postpaid to 4th zone. Not prepaid: 10 lbs., 95c; 25 lbs., \$1.75; 60 lbs. (bu.), \$2.95; 100 lbs., \$4.50; 500 lbs., \$22.25.

CHIPPEWA

A medium late potato introduced by the U. S. Dept. of Agriculture, which has yielded 464 bushels per acre. It is of outstanding merit for the northern states and most valuable for other sections. It is oblong in shape, has smooth white skin, shallow eyes, and sparkling white flesh that cooks up dry and mealy. Excellent for baking.

Wherever tried, Chippewa has leaped into prominence, because of its immense yield and its excellent quality. Chippewa shows high resistance to mild mosaic disease, and in tests has outyielded such other potatoes as Katahdin, Green Mountain, Cobblers, and Rural New Yorker. Matures earlier than the other late potatoes. U. S. No. 1: 2 lbs., 38c; 5 lbs., 68c, postpaid to 4th zone. Not prepaid: 10 lbs., 58c; 25 lbs., \$1.27; bu. (60 lbs.), \$2.87; 100 lbs., \$4.20; 500 lbs., \$20.75. Bags are free on all potatoes.

Sebago
Potatoes

SEBAGO

About the best late potato for Wisconsin, and equally good for other states. It is not a good yielder on poor, sandy soil, but on fertile soil it yields heavily, it is of high quality, it cooks white, seldom shows hollow heart or internal discoloration and hardening, and it is resistant to yellow dwarf disease and to the late blight which causes a form of tuber rot.

Sebago potatoes are white, thin skinned, shallow eyed, and oval to oblong in shape. The vines are large and vigorous, of upright habit. During hot weather it may roll its leaves but this has no connection with the Leaf Roll Disease. Its great feature is its heavy yield on good soil and its resistance to yellow dwarf and blight. U. S. No. 1: 2 lbs., 38c; 5 lbs., 68c, postpaid to 4th zone. Not prepaid: 10 lbs., 58c; 25 lbs., \$1.27; bu. (60 lbs.), \$2.87; 100 lbs., \$4.20; 500 lbs., \$20.75.

Potato Prices Are Ceiling Prices or Lower. Ceiling Subject to Advance April 1 and again on May 1. If Potatoes Are Wanted By Mail, Please Add Necessary Postage. See Page 99.

SALZER'S CALIFORNIA GIANT DOUBLE ZINNIAS

This beautiful Zinnia has smaller centers and more loosely placed petals than the old type of Large Flowering Zinnias and the size of the flower has been notably increased. The petals are decidedly imbricated and the flower from bud to bloom assumes a succession of graceful forms. 3 to 4 feet.

The flowers are truly giant in size, frequently measuring 6½ to 7 inches in diameter, and are borne on long and strong stems. When cut the graceful blooms last exceptionally long in water, and make a lovely bouquet. Everyone who has grown them, has greatly admired this lovely mammoth type of Zinnia, and its lovely range of colors. We offer it with the confidence that you too will be well pleased with the colors, and the large size of the flowers.
